EMPL High pressure pistol Partner

The Partner High pressure pistol is a balanced high pressure pistol and is made of a wholly hardened and tempered alloy, painted with epoxidated dust at 180°. A real PARTNER for the fire men on site!

Nozzle and tube in a large thickness anodised alloy.

Hand grip in graphitized black shock resistant nylon.

Internal control parts in INOX steel and brass with gaskets in pressed lubrifon.

Rubber buffer on front and on the lever; two rubber grips on the hand grip (with possibility to personalise them);

Hydraulic shock absorber set-in upper part of the hand grip, this one annuls water hammering in phase of opening and closing of jet.

Lower rotating coupling in brass on sphere with fire hose connection UNI 38x1,5 or GAS 11/2 or alternative Storz HD couplings or other couplings on request can be mounted

Capacity: 200 lit. / min. at 40 bar
230 lit. / min. at 45 bar

Throw distance: 27m (straight) at 200 lit. / min. at 40 bar

Jet options: straight and spray jet controlled from the turnable hand control

Weight: 2,6 kg

Length: appr. 440mm

Recommended hose length of 1" hose: max. 60m

Foam tube with quick coupling as option is available
