

EMPL centrifugal
fire fighting pump

www.empl.de

Technical specifications

Type

- NP- Normal pressure Pump
- centrifugal pump
- single stage

Use

- vehicle rear mounted pump

Material

- pump housing, impeller
- aluminium, seawater resistant or red brass bearing housing
- NP 3000 aluminium, from NP 4000 cast iron pump shaft
- stainless

Bearing

- without oil, maintenance free

Shaft sealing

- mechanical seal, maintenance free

Direction of rotation

- clockwise, look at the drive flange from the pump

Drive

- drive flange

Suction inlet, Pressure outlet

- basic equipment flange, horizontal

Priming system

- VACUMAT Single or Double
- automatic priming pump(s)
- manual switch on or automatic operation
- without oil, maintenance free
- priming time at 7,5 m suction height < 30 seconds
- disconnection at 0,8 bar pressure at pump housing

Voltage

- 24 V DC (standard)

Colouring

- fire red RAL 3000 or white aluminium RAL 9006 (standard)

Safety unit

- thermal relief at 55°C with thermal valve (basic equipment) without current outwards, outlet hose spout 1/2"

Measuring points

- connections at the pump for pressure gauges (basic equipment)
- connection for tachometer, standard 10 impulses/rotation (more price tachometer)
- connection for pressure sensor
- limit pressure 17/20 bar, (more price sensor)

Accessories

- suction inlet as flange
- thread flange G 4 1/2"
- 3-way-valve
- siamesis manifold for pressure outlets with valves
- taps
- auxiliary outlets
- monitor outlet
- instrument panel with gauges
- rev counter
- hour meter

FPN 10 - 1000 - 3000
 FPH 40 - 250
 EN 1028 - 1

VACUMAT

- 1 ... FPN-Impeller
- 2 ... Pump shaft
- 3 ... Pump shaft
- 4 ... Drain outlet
- 5 ... mechanical seal
- 6 ... bearing
- 7 ... Drivebelt (Antrieb Vacumat)
- 8 ... Coupling flange
- 9 ... Vacumat
- 10 ... FPH-Pump body
- 11 ... FPH-Impeller
- 12 ... FPH-casing with transfer passages
- 13 ... FPH-Cap of transfer passages
- 14 ... Flange
- 16 ... Controll attaching
- 17 ... Pressure water line
- 18 ... Pistons
- 19 ... Cylinder
- 20 ... Excentric

General view of classification to EN 1028-1

Type	Classification to EN1028-1	Nominal output l/min	Coupling force kW	Vacumat
NP 500	FPN 6-500	3000	18	VACUMAT

H.I.T. CAN-Bus Pump control panel

Fire fighting vehicles of EMPL - Focus on innovation

State of the art computer controlled production systems together with highly trained staff guarantee top quality EMPL products.

The most up to date computer-controlled production systems, combined with the best trained employees, guarantee the high quality of EMPL products. The high-tech machines can be used for individual products just as economically as for series productions.

The Very Latest Production Systems

Continous performance and safety assesments

Highest customer satisfaction is extremely important. Therefore, processes are continuously being observed and optimized. The consistent fulfillment of customer expectations and the willingness to implement innovative solutions together with the customer play a significant role.

EMPL is one of the few body builders, tests the bodies prior to delivery on its own test track. This ensures that users can rely on the vehicle performing perfectly even under extreme working conditions.

High-Tech test facilities

Training and After Sales

Even after the purchase, the company pays particular attention to their customers. In a modern presentation room, the vehicles are handed over to the users. In addition, training courses are held worldwide on-site to guarantee optimum operating efficiency of the products. The permanent reachability of the after-sales employees and the worldwide supply of spare parts make EMPL to a reliable partner.

Test track

Continuous investment in modernising the plants are one of the recipes for success.
